String Manipulation

1. Program to Check Two Strings Are Anagram Of Each Other in Java.
2. Java String Program to Print Even-Length Words.
3. Java String Program to Replace a Character at a Specific Index.
4. Write a program to check if the word 'orange' is present in the "This is orange juice".
5. Write a Java program to compare a given string to another string, ignoring case considerations.
6. Write a Java program to compare two strings lexicographically. Two strings are lexicographically equal if they are the same length and contain the same characters in the same positions.
7. Write a Java program to find the length of the longest substring of a given string without repeating characters.
